Our NEW tube for all molecular
genetic stool analyses:

A712A	Microbiome Mini
A712B	Microbiome Midi
A712BW	Microbiome Midi Plus
A712C	Microbiome Maxi
A712CW	Microbiome Maxi Plus
A171	Profile Mucin/ butyrate formation
A121	Mycobiome: Relevant Yeasts
A121N	Yeasts control measurement

A169	Worms, Microsporidia
A111	Florastatus Plus
A131	Basic Profile Gut Plus
A179	Profile Viral Enteritis Pathogens PCR
A178	Profile Parasites PCR
A178B	Blastocystis Subtype Differentiation
A178C	Blastocystis subtypes single request
A178N	Parasites control measurement

All further stool analyses are still being
examined with native stool tubes or
the familiar special test sets.
